

## **Search Enhancement: Addresses and Notes "Glow" During Searching**

- Finding a specific stop on a route with many locations is time consuming and annoying
- Route4Me's new real-time location highlighting features automatically finds and highlights
  - Searches and highlights stops by every attribute, including custom attributes
  - Searches and highlights the point of entry into the geofence and the point of exit out of a geofence
  - Searches and highlights all notes and status flags
